

IMPLANTONAN 30-VUOTISSYMPOSIUM 27.9.2024

Finnkino Tennispalatsi Kamppi, Helsinki

**Advancements in xenograft utilization for
periodontal plastic surgery and implantology**

**Immediate implantation in private practice:
rationale and implementation**

Dr. med. dent. Marco Zeltner

Specialist Dentist for Reconstructive Dental Medicine SSO

**Digital innovations for patient
communication & minimally invasive
restorations: ortho meets resto**

PD Dr. med. dent. Alexis Ioannidis

Head of Fixed Prosthodontics, University of Zurich

OHJELMA

8.30–11.00	Aamupala ja elokuvanäytös
11.00–11.45	Lounas
11.45–12.00	Tervetuloa ja luennoitsijoiden esittelyt
12.00–14.00	Luento
14.00–14.30	Kahvitauko
14.30–16.00	Luento
16.00–16.15	Virvokkeita
16.15–17.00	Luento
17.00–19.00	Cocktailtilaisuus Tennispalatsin lämpiössä

Implantona järjestää 30-vuotisen taipaleensa kunniaksi koko päivän huipputapahtuman hammaslääkäreille ja erikoishammaslääkäreille. Päivän aikana käsiteltäviin aiheisiin lukeutuu mm. pehmytkudosregeneraation uusimmat hoitomenetelmät, välittömät implantoinnit, digitaalisuuden hyödyntäminen potilaskommunikaatiossa sekä oikomishoidon yhdistäminen restoratiiviseen hoitoon. Lisäksi tarjolla on viihtyisää ajanvietettä ja verkostoitumista Finnkino Tennispalatsin ikonisissa tiloissa Helsingin Kampissa. Tervetuloa!

Dr. med. dent. Marco Zeltner

Advancements in xenograft utilization for periodontal plastic surgery and implantology

Depletion of oral tissue due to trauma, aging, and bacteria requires innovative approaches in periodontal surgery and implantology. This presentation discusses modern therapies aiming for tissue regeneration, focusing on both biological recovery and aesthetic results. Procedures often use xenogeneic materials for soft tissue and bone regeneration, offering advantages in availability and eliminating the need for traumatic graft harvesting. The lecture provides an overview of these strategies, emphasizing the effective use of xenografts and their adaptability to enhance patient outcomes. Overall, it promotes the integration of xenografts to advance care standards in private practice.

Dr. med. dent. Marco Zeltner, Specialist Dentist for Reconstructive Dental Medicine SSO

Dentistry has always greatly fascinated Dr. Marco Zeltner – and still does today. After five years as assistant dentist here in Horgen, Dr. Zeltner went to the University of Zurich, where he studied to become a specialist for reconstructive dental medicine. His focus in dentistry lies in aesthetic dentistry and the replacement of missing teeth with reconstructions of teeth and implants. In addition to working with patients, Dr. Zeltner places great emphasis on contributing to dentistry in general as well. Currently, he is President of the Academic Alumni Association of the Clinic for Dental Crown and Bridge Prosthetics, Partial Prosthetics and Dental Material Science called "KBTMreloaded", and also organizes an advanced training course weekend for dentists.

Immediate implantation in private practice: rationale and implementation

Tooth extraction is a routine dental procedure, often necessitating replacement with fixed or removable restorations. Dentists must carefully evaluate available options with patients. Alongside simple extraction, strategies such as Alveolar Ridge Preservation and Immediate Implant Placement offer alternatives at the time of tooth extraction. Success in immediate implantation hinges on several key factors. This presentation provides a comprehensive overview of post-extraction biological processes, delves into the rationale and methodology behind immediate implant placement, and equips clinicians with essential insights for informed decision-making during extractions.

PD Dr. med. dent. Alexis Ioannidis

Digital innovations for patient communication & minimally invasive restorations: ortho meets resto

In the rapidly evolving field of digital dentistry, the intersection of restorative dentistry and orthodontics through digital innovation represents a significant step forward in patient-centered care. This presentation will explore

the key role of digital technologies in enhancing patient communication and facilitating minimally invasive restorative procedures, incorporating the holistic approach of "Ortho meets Resto".

PD Dr. med. dent. Alexis Ioannidis, Head of Fixed Prosthodontics, University of Zurich

Dr. Alexis Ioannidis completed his undergraduate studies at the University of Zurich in 2009, and subsequently earned the title of Dr. med. dent. in 2013, followed by the Venia Legendi (Habilitation) for Reconstructive Dentistry in 2021, both from the same university. Since 2017, Dr. Ioannidis has been a full-time Senior Teaching and Research Assistant and, since 2023, Head of Fixed Prosthodontics at the Clinic of Reconstructive Dentistry at the University of Zurich. With an interest in advancing the field of prosthodontics, Ioannidis' primary scientific focus lies in the realm of minimally invasive prosthetic treatment concepts. He has contributed significantly to the field through his publication of over 40 scientific and clinical articles in high-ranked peer-reviewed journals.

AIKA: Perjantai 27.9.2024

PAIKKA: Finnkino Tennispalatsi Kamppi, sali 5
Salomonkatu 15, 00100, Helsinki

HINTA: Early bird -hinta 31.5.2024 asti 300 €
Normaalihinta 1.6.2024 alkaen 360 €
Hinta erikoistuville 300 €. Hinnat sis. alv.

KIELI: Luennot pidetään englanniksi
